

Please reject the NAB's petition 04-160. I have satellite radio and enjoy it in my car as well as in my office with the satellite boombox. It is great. Please don't restrict XM radio from offering the quality programming that we listeners want. As a paid subscriber, I don't appreciate the National Assoc of Broadcasters trying to prevent satellite radio from offering the news, weather, and information that I want to be able to hear.
